

JSS COLLEGE FOR WOMEN CHAMARAJANAGAR
DEPARTMENT OF GEOGRAPHY

PROGRAM OUTCOME: GEOGRAPHY

- To understand the scope and evolution of the diverse discipline of Geography.
- Understand the structure, composition of different spheres of the earth and its Atmosphere.
- Understand importance of oceans, rivers and water and find the ways of their conservation.
- An understanding and acknowledgment of the threats that endanger the earth's natural systems. This helps in further realization of the significance of anthropogenic causes of many of the disasters and threats that puts life on this planet on the edge.
- Students become equipped with the ability to respond to both natural and man-made disasters and acquire management skills. This is attained through the curriculum by studying and analyzing hazards, disasters, their impact and management.
- Understand the science of Remote Sensing, And Geographical Information system.
- The students are able to do Higher Education in M.Sc in Geography, M.Sc in GIS, M.Sc in Geo-informatics, PG Diploma in GIS , M.Sc in Remote Sensing & GIS, PG Diploma in Geographical Cartography, M.Sc in Cartography, MSW, M.Lib & Information science, B.Ed, LLB, MBA.

DEPARTMENT OF GEOGRAPHY

COURSE OUTCOME-2017-2018

SEM	COURSE CODE	TITLE OF THE PAPER	OUTCOME
I	LA470	Physical Geography-I	<ul style="list-style-type: none"> • Understand the importance of longitudes and latitudes. • To know the internal structure of the earth. • To gain knowledge about the agents of denudation. • To analyze the composition and structure of atmosphere.
II	LB470	Physical Geography-II	<p>1.define the field of climatology and to understand the atmospheric composition and structure.</p> <p>2. to outline the mechanism and process of solar radiation transfer to earth surface and to ex- plain the temperature distribution and variation according to time and space.</p> <p>3. to illustrate and explain the air pressure system, wind regulating forces and the formation of the Atmospheric Disturbance.</p> <p>4. to understand and compute the air humidity as well as to explain the process of Condensation and formation of precipitation and its types.</p> <p>Relief features of ocean floor and ocean currents</p>
III	LC470	Regional geography of the world	<ul style="list-style-type: none"> • To know about the relief features, mineral resources and power resources of the world. • To gain knowledge about the human life style and human activities as well as modes of transportation.
IV	LD470	Human Geography	1.Students will learn how human, physical, and environmental components of the world interact.

			<p>2. Students will be familiarized with economic processes such as globalization, trade and their impacts on economic, cultural and social activities.</p> <p>3. The student will describe what geography and human geography are.</p> <p>4. Understand population dynamics and migration.</p> <p>5. Understand the basics concepts of human geography</p> <p>6. Study population attributes and dynamic nature of it</p> <p>7. Introduce economic, cultural, and trade activities and their impact on the development</p>
V	LE470	Geography of India-I	<ul style="list-style-type: none"> • To understand the location, physiographic, drainage, climate and vegetation of India. • To gain knowledge about the features, problems and prospects of Agriculture. <p>To analyze the human resources, power and mineral resources.</p>
	LE472	Regional geography of Karnataka	<ul style="list-style-type: none"> • To understand the location, physiographic, drainage, climate and vegetation of Karnataka. <p>To analyze the role of different sectors of Karnataka economy.</p>
VI	LF470	Geography of India-II	<p>To gain knowledge about population, industries, Trade, natural resources, transportation and tourism of India.</p>
	LF482	Economic Geography of the world	<ul style="list-style-type: none"> • To understand the field, nature, importance, scope and approaches of economic geography. <p>To analyze the role of different sectors of Global economy.</p>
